

A SUSTAINABLE, MODULAR CONSTRUCTION SYSTEM CREATED FOR INFORMAL SETTLEMENTS (SLUMS)

start
somewhere^{.EU}

MORTAR-FREE & EASY TO HANDLE:

- modular hollow concrete blocks.
- L50 cm x W24 cm x H17,5 cm; weight 20 kg
- up to 10 times faster to build than common walls.

FLEXIBLE FLOOR PLANS & DECONSTRUCTABLE:

- the wall segments can be folded steplessly to make most use of the space between the winding alleys of slum areas.
- deconstructable: a huge benefit where land can't be owned.

AFFORDABLE HOUSING:

- affordable housing through economic use of concrete.
- fire safety through avoiding the use of wood.
